

We become your outsourced RN care-management department.

Registered nurse support for the patient follow-up that happens between visits, so the work gets done without adding to your front desk or clinical staff.

WHAT ANU HANDLES

Chronic care management support

Regular patient check-ins and care plan follow-up, documented to your workflows.

Transitions of care

Follow-up after hospital or facility discharge: instructions, medications, next visit.

RN care coordination

Coordinating with specialists, pharmacies and other providers.

Patient navigation

Helping patients keep appointments and move through referrals.

Community resource coordination

Connecting patients with Upstate aging, caregiver and transportation resources.

WHAT YOUR PRACTICE KEEPS

- ✓ The patient relationship
- ✓ Clinical decision-making
- ✓ Patient eligibility determinations
- ✓ Applicable Medicare billing

HOW IT STARTS

- 1 Practice consultation.** We talk through your patients, staffing and where follow-up falls behind.
- 2 Agree on scope.** Services, workflows and documentation are set to your practice's policies.
- 3 RN support begins.** Your team stays informed while the follow-up gets done.

BUILT AROUND MEDICARE SERVICES YOUR PRACTICE ALREADY OFFERS

Chronic care management and transitional care management can be billed by your practice when patients are eligible and program requirements are met. The limiting factor is usually staff time, and Anu provides it. Anu does not bill Medicare or guarantee reimbursement.

Samantha, RN — Founder

18 years of nursing across home health, behavioral health, med-surg, and geriatric and memory care.
